

# ISOframe<sup>®</sup> wave

**Ultimate flexibility**  
A new unique display and exhibition system item

# ISOframe<sup>®</sup> Compact

**A MODULAR SYSTEM** with  
design and stability in focus

ISOframe Wave is the first fully flexible exhibit wall. Just flex the entire display the shape you need at each venue. Extend or reduce as required. No other display system offers this much flexibility. To achieve this flexibility a patented Flexi-wave link connects each vertical post in the system. Each graphic can be flexed up to 180° in any direction yet the structure remains unbelievably strong and stable. Just add 800 mm extender units to the original 800 mm wide starter unit section for larger displays. Because Wave is based on our ISOframe concept it also incorporates our patented FASTclamp connector. No more struggling with the nuts and bolts used on other systems. Additional beams can also be attached for shelving, or TFT/LCD screens.

### Features & Benefits

- Easy "no tools" assembly
- Flex the entire display to create the shape you need
- Enlarge or reduce to suit the event
- Mini 205 cm, Midi 225 cm or Maxi 245 cm height.
- All graphic panels are 800 mm wide
- Use regular pop-up (flexible) panels
- Perfect alignment of graphics even if floor is not level
- Build in LCD screens
- Easily attach tables and shelves
- Perfect for shell schemes or space-only events
- Extremely compact during transport

ISOframe Compact is aimed at the portable and semi-permanent sector of the display market. It is sufficiently strong to accept multiple accessories such as LCD screens, leaflets holders etc. The addition of keyboard plinths makes Compact ideal for computer stations and internet access points. All Compact systems can be extended or reduced in size to suit individual sites, thus offering exhibitors considerable additional benefits over the standard-size-only pop-up. Just add 800 mm extender units to the original 800 mm wide starter unit section for larger displays. Compact incorporates our patented FASTclamp connector to connect the posts, beams and end sections of the system instantly, without tools.

### Features & Benefits

- Easy "no tools" assembly
- Enlarge or reduce to suit the event
- Three style options/end sections
- Mini 205 cm and Midi 225 cm height
- Use flexible, semi-rigid or rigid\* panels
- All\*\* graphic panels are 800 mm wide and can be interchanged
- Perfect alignment of graphics even if floor is not level
- Build in LCD screens
- Easily attach tables and shelves
- Extremely compact during transport

\* Straight extension units only  
\*\* Except graphic wing panels which are 400 mm
