Outdoor Digital Signage

Is an effective way to implement digital signage in outdoor or harsh locations. Offers a dynamic signage solution for even the brightest of open air application, with high-impact digital signage that's as eye-catching as it is adaptable.

A trans-reflective LCD Panel is used to produce bright, clear images, and the back light combines with direct external lighting to enhance visibility. A forced - air cooling system using outside air follow allows the panel to withstand internal temperature rises caused by sunlight.

Features

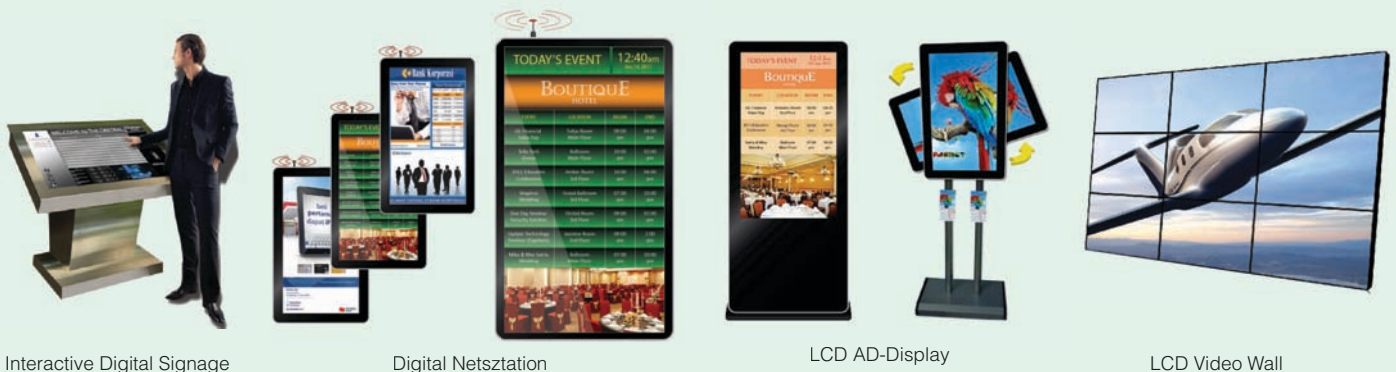

1. Build in brightness sensor - can adjust the brightness automatically according the ambient light (day & night).
2. Waterproof, Anti Break Glass and Anti-Vandalism.
3. Fashionable appearance, can be used in different places
4. Support 1080p high definition video.
5. Centralized update by using Digital Signage controller.

SPECIFICATION

Screen Size	55 Inch active matrix TFT-LCD industrial display
Display Area	680.4 x 1209.6 mm portrait orientation
Native Resolution	1080 x 1920 (Full HD Potrait)
Brightness	1500 cd/m ² , LED backlight enhanced
Contrast Ratio	1300 : 1 (Dynamic 6500:1)
Dimming	Auto dimming by light sensor
View Angle	89° x 89° x 89° x 89°
Response Time	4.5ms
Interface	VGA, HDMI, S-Video, AV
Operating Voltage	AC 100 ~ 240 V 60/50Hz
Power Consumption	520 Watt (1120 W with AC)
Accessories	AC Power Cord, Remote Controller
Weight	235 Kg approx. with air - coditioner
Wide Operating Temp. Range	(-30) - 50 (°C)
Wide Operating Humidity	10 % - 85 %
System	Netstation with Intel [®] or AMD [®] embedded

Other Digital Signage Solution
